UI/UX Design & Prototyping

Section 4.4 — Wireframes, mockups, and UI/UX guidelines

MediCare — Clinic Management & Appointment System

ASP.NET Core MVC · N-Tier · Microsoft Azure

Team: Mohamed Munir (Team Lead) · Malak Hany · Ashraf Ibrahim · Leqaa Ibrahim · Natalie Bola

November 2026

12. UI/UX Design & Prototyping

12.1 Wireframes (22 pages, from the PDF)

Shared top bar on every screen: MediCare logo, role tabs, **Dark** toggle, **Alerts**, user chip.

Public / Patient (pages 1–13) — tabs: Home · Book · My care · Appointments · Profile · Notifications

Page	Screen
1–3	Home: headline + search bar (Specialty / Location / When → "Find a doctor"), doctor cards (fee, location, weekly availability dots, Reserve); p.2 specialty filter dropdown; p.3 notifications popover
4	Doctor profile: next available slots, "Book an appointment", about, weekly availability, patient reviews
5–6	Book: choose day/time slots (morning/afternoon/evening), appointment summary card with ID/barcode, "Confirm booking"
7	My care: visit timeline, weekly schedule, documents (open)
8	Appointments list: Confirmed/Pending with Reschedule / Cancel, "New appointment"
9	Prescription view: print layout, Download PDF / Print, prescription history
10	Profile: personal info, known allergies, medical history, notification preferences (SMS / Email / in-app), medical records downloads
11	Notifications: All / Appointments / Reminders / System, delivery settings
12	Login (role chips Patient · Doctor · Admin)
13	Register: create patient account (Patient / Doctor toggle)

Doctor (pages 14–17) — tabs: Dashboard · Schedule · Patients · Visit record

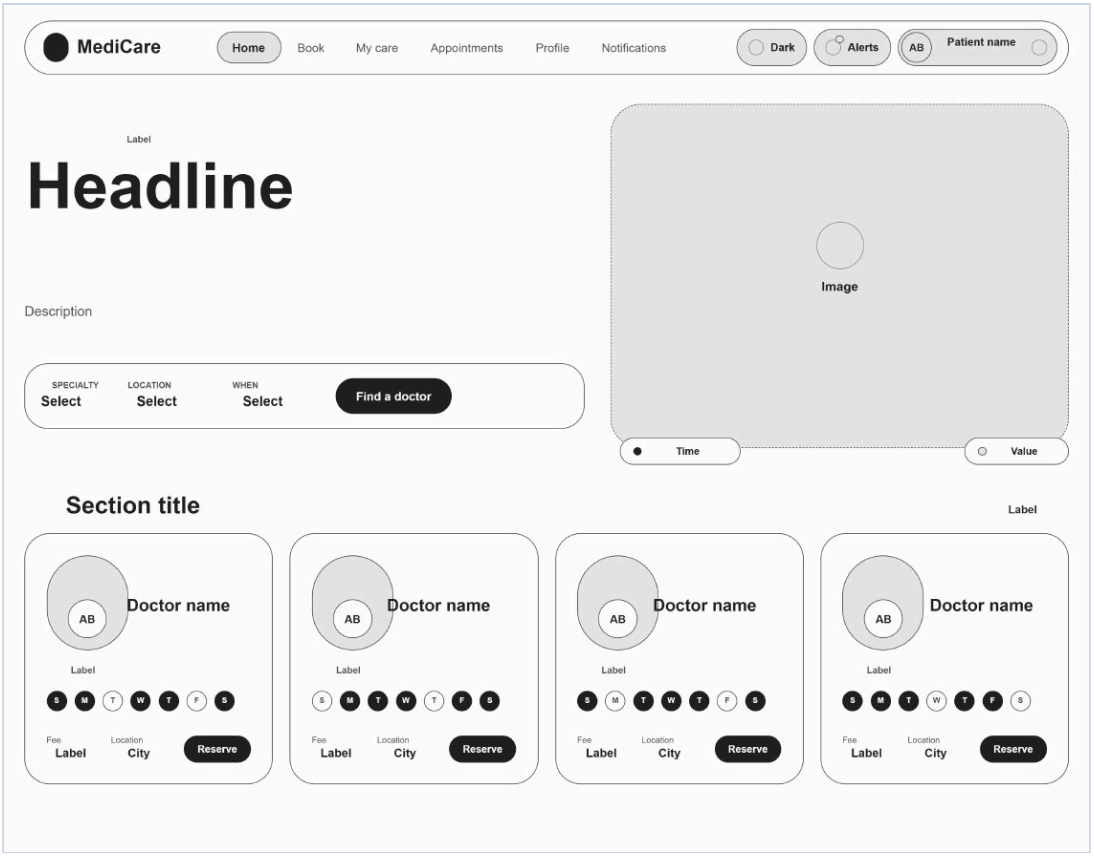

Page	Screen
14	Dashboard: KPI tiles, next patient, today's list, appointment requests (Reject / Confirm), chart
15	Schedule: weekly calendar grid, working hours toggles, vacation days ("Block these days")
16	Patients: list + patient detail (allergies, active medication, recent history) with "Start visit"
17	Visit record: medical record (symptoms, diagnosis, treatment notes) + prescription form (medication, dosage, frequency, duration, "Add medication"), Preview & print / Save visit

Admin (pages 18–22) — tabs: Overview · Doctors · Patients · Appointments · Settings

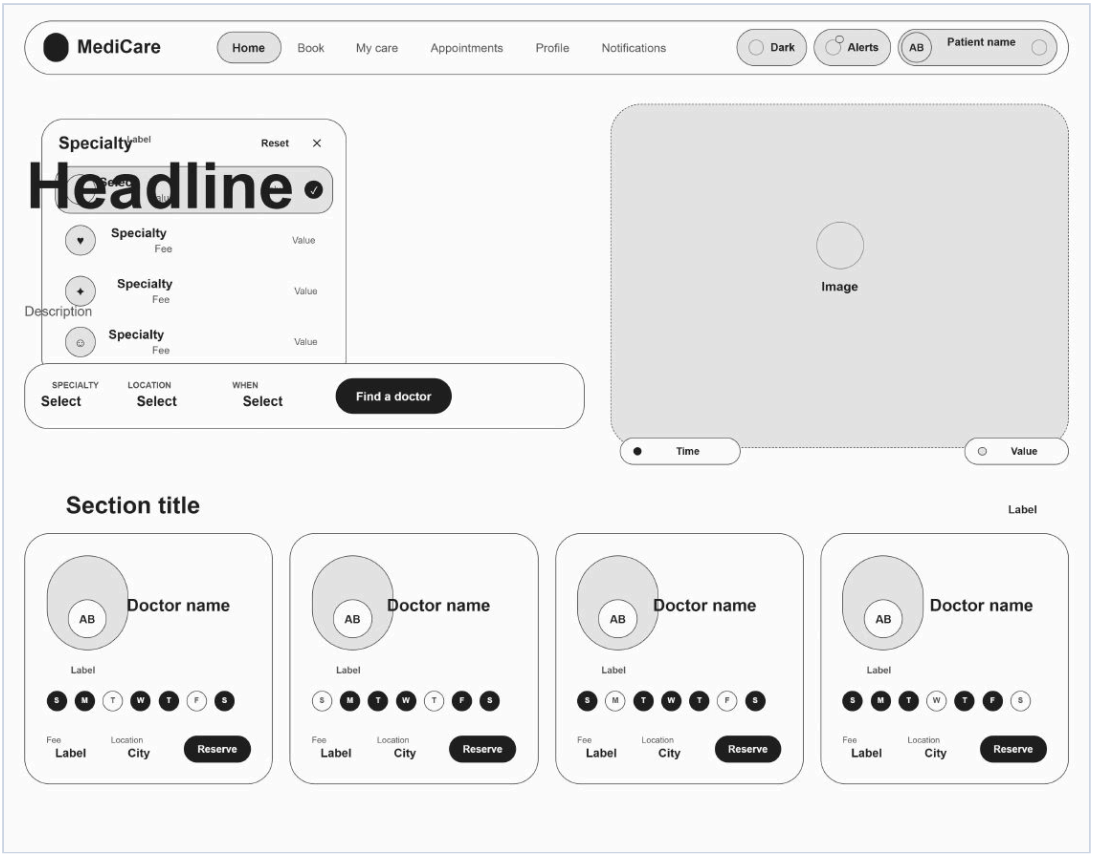

Page	Screen
18	Overview: KPI tiles, monthly appointments chart, top specializations, pending doctor approvals; Export PDF / Excel
19	Doctors: status filters (All/Pending/Approved/Suspended/Rejected), doctor table, detail panel with Approve / Reject
20	Patients: table with Suspend / Restore access
21	Appointments: filter by status, table, export PDF / Excel
22	Settings: specializations (add/remove), clinic settings (SMS reminders, email notifications)

Wireframe screens

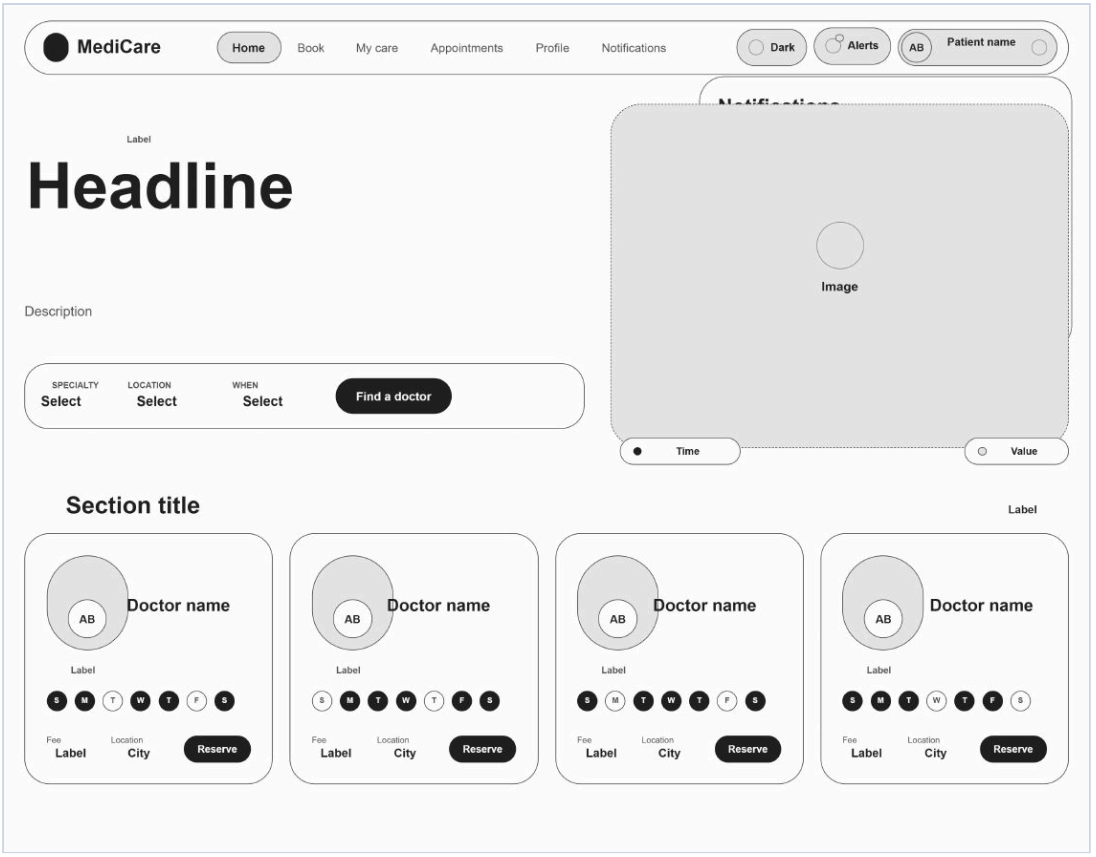

All 22 wireframe screens in order (page numbers match the table above).

12.2 Mockups / prototype

The interactive prototype ("MediCare – merged prototype", one HTML file) covers all three roles with role-based navigation and a light/dark theme. Screens below are captured from the prototype at 1440 px width.

Guest

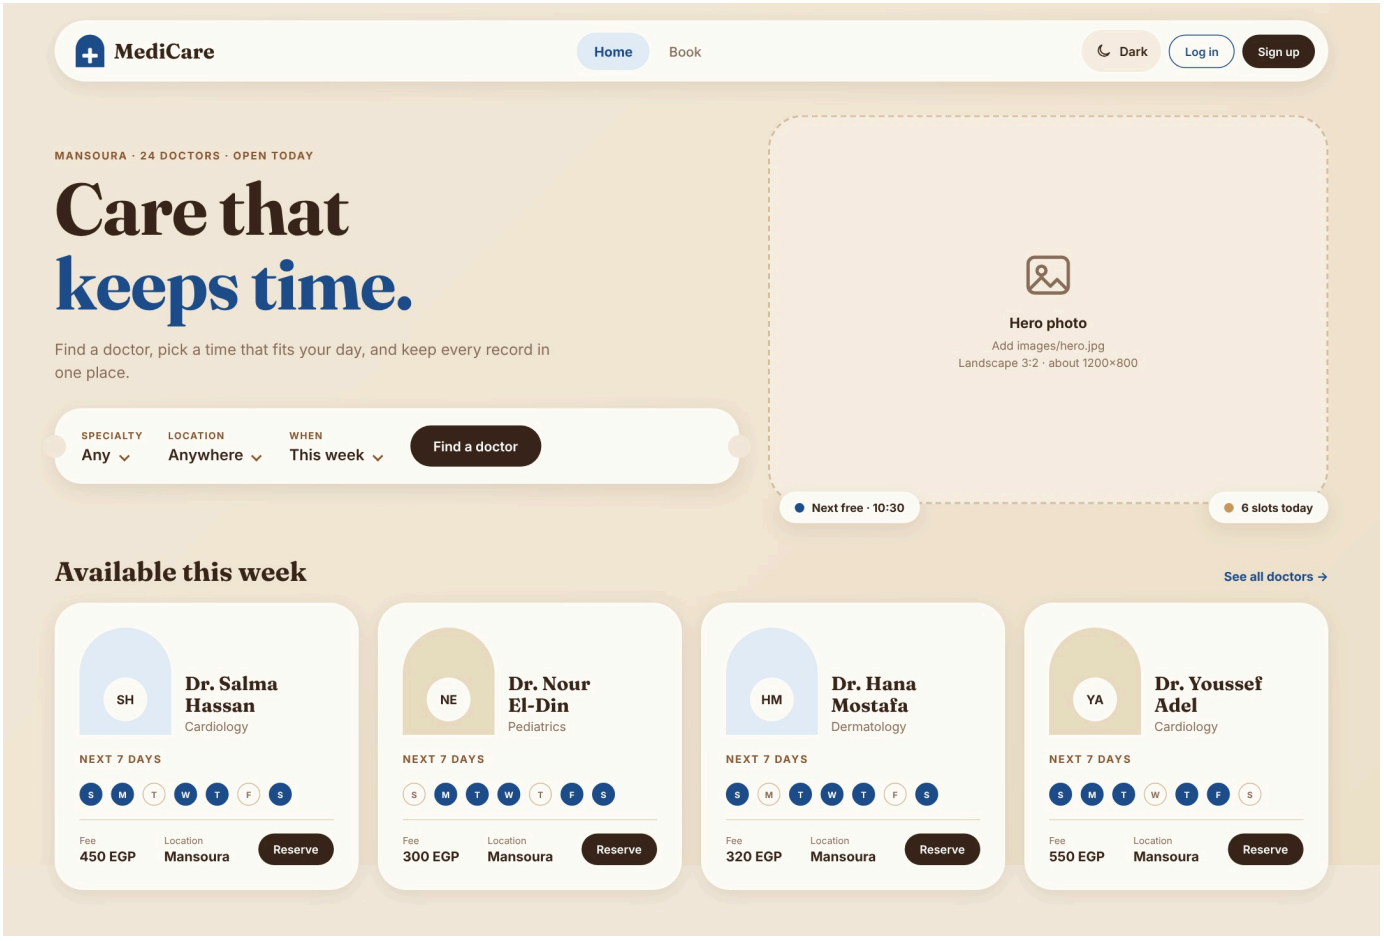

Figure 1. Home (guest) — doctor search and listing

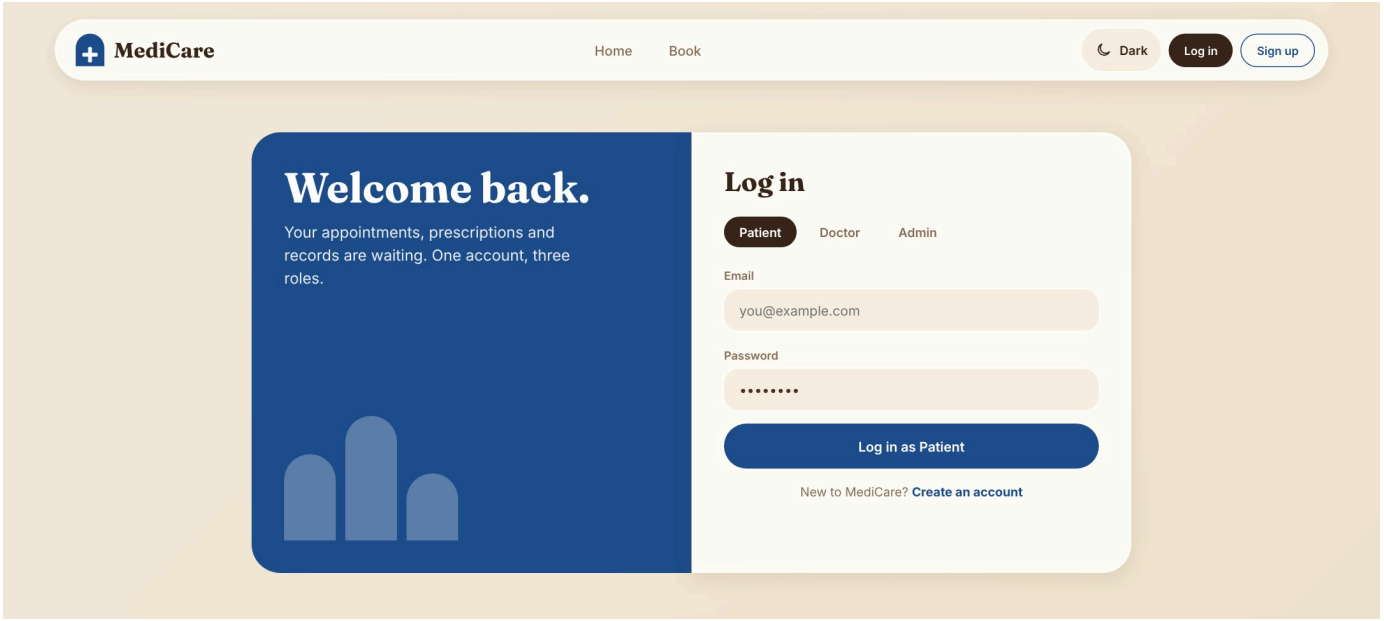

Figure 2. Log in (role selector)

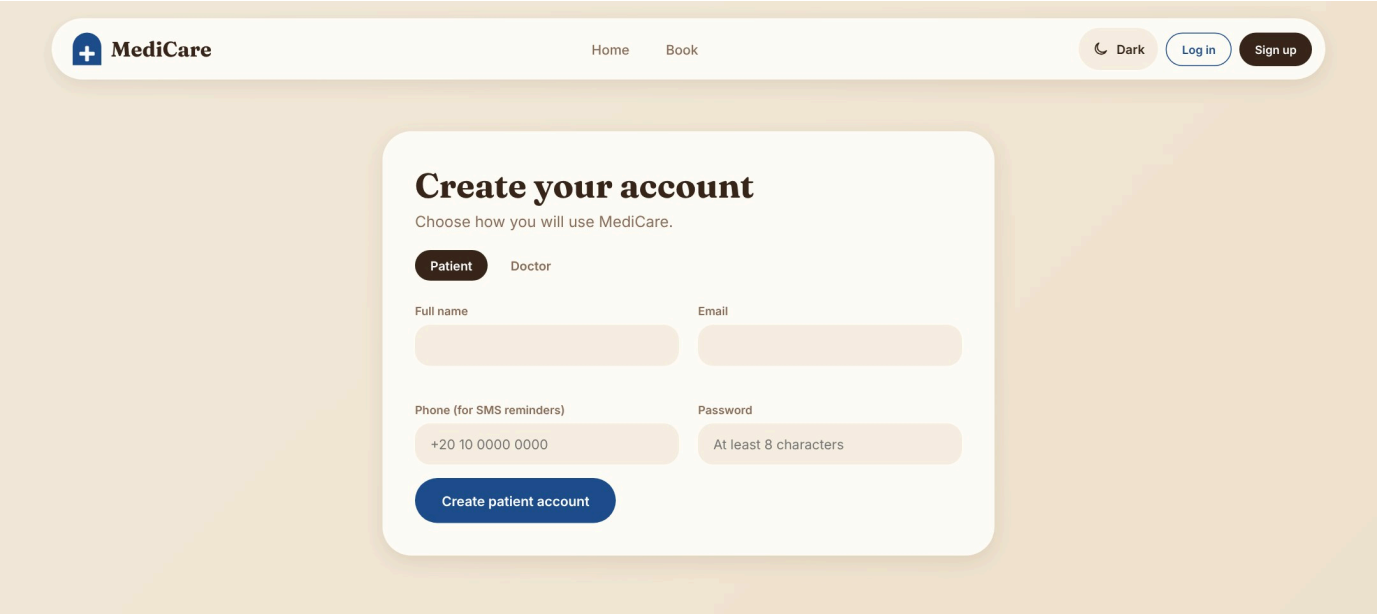

Figure 3. Create an account

Patient

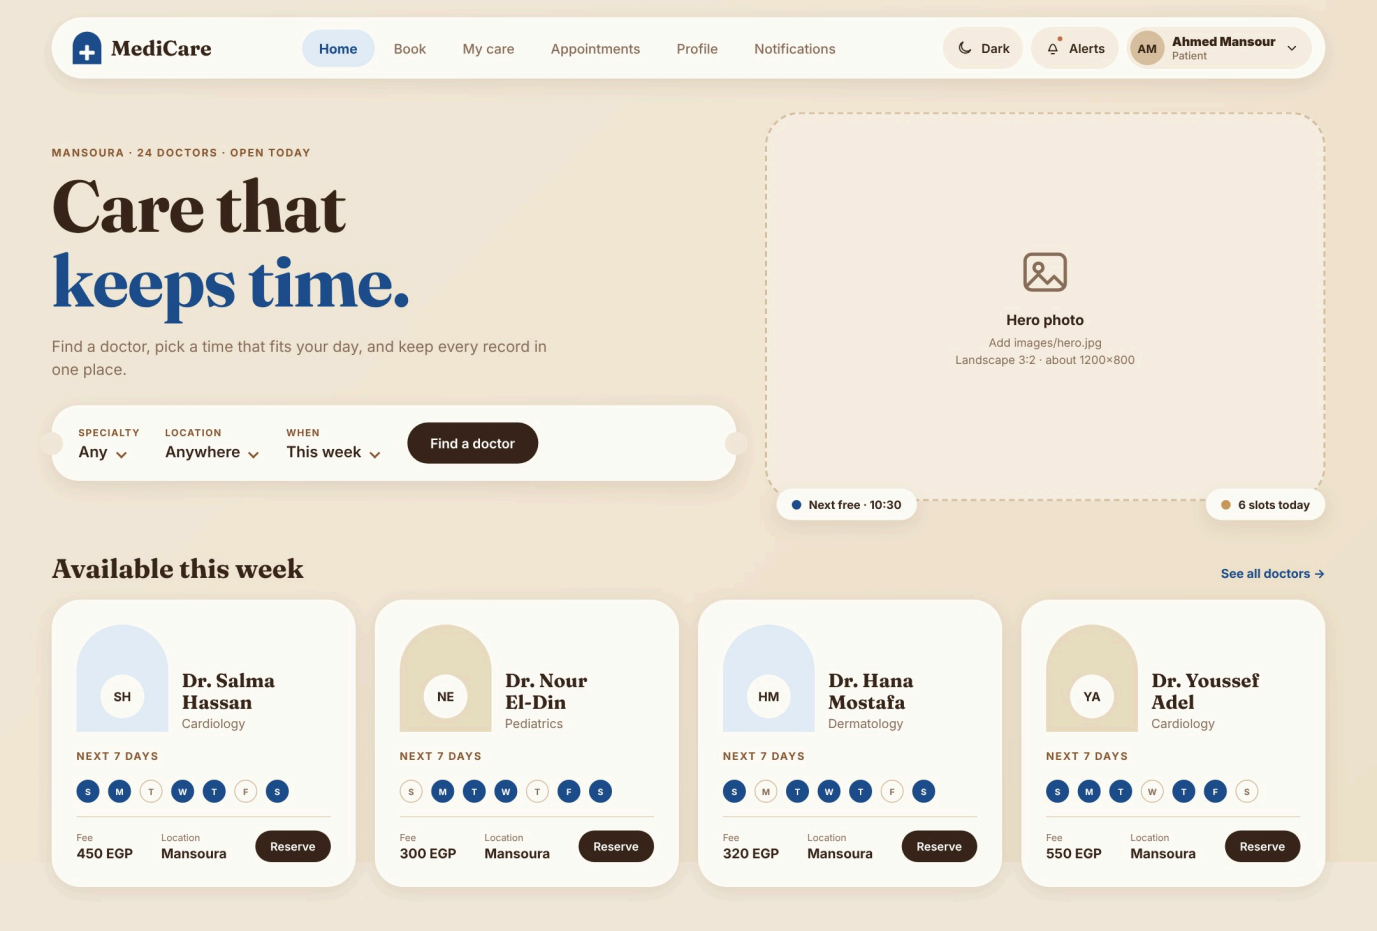

Figure 4. Patient — Home

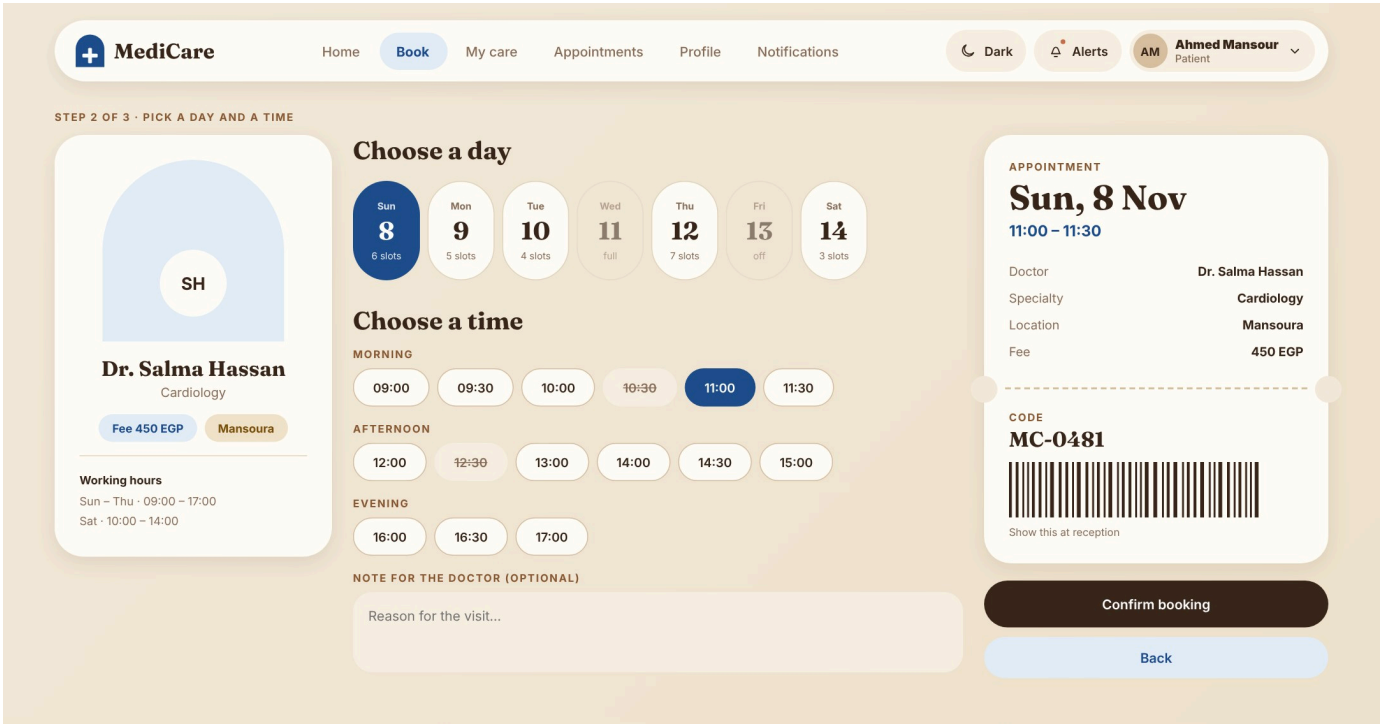

Figure 5. Patient — Book an appointment (slot selection and ticket)

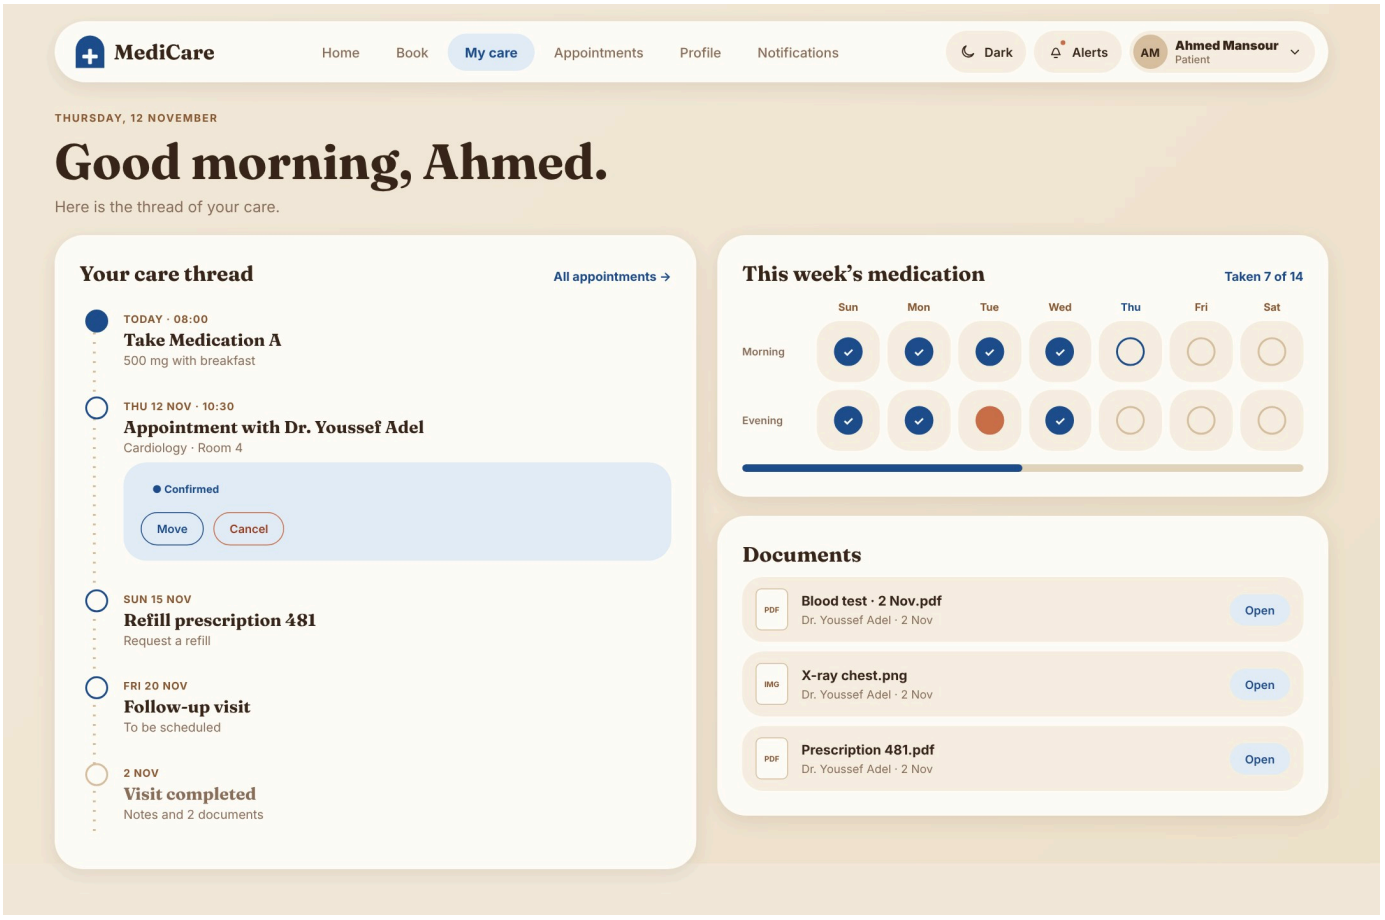

Figure 6. Patient — My care (visits, schedule, documents)

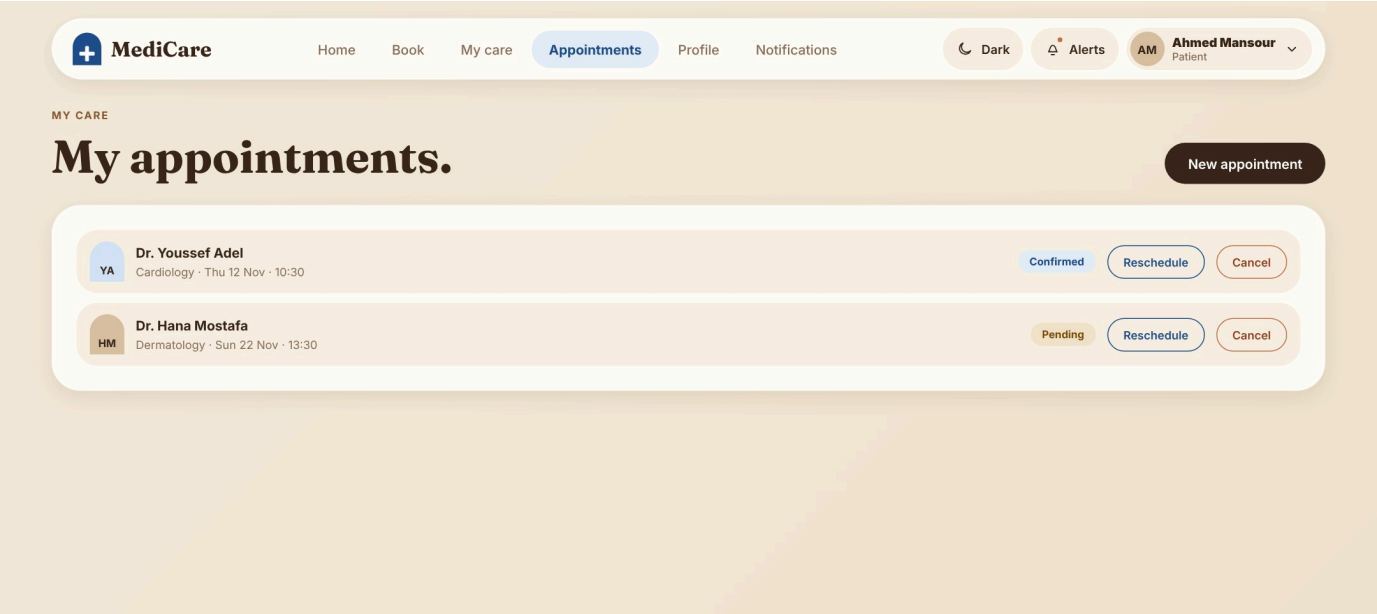

Figure 7. Patient — Appointments (reschedule / cancel)

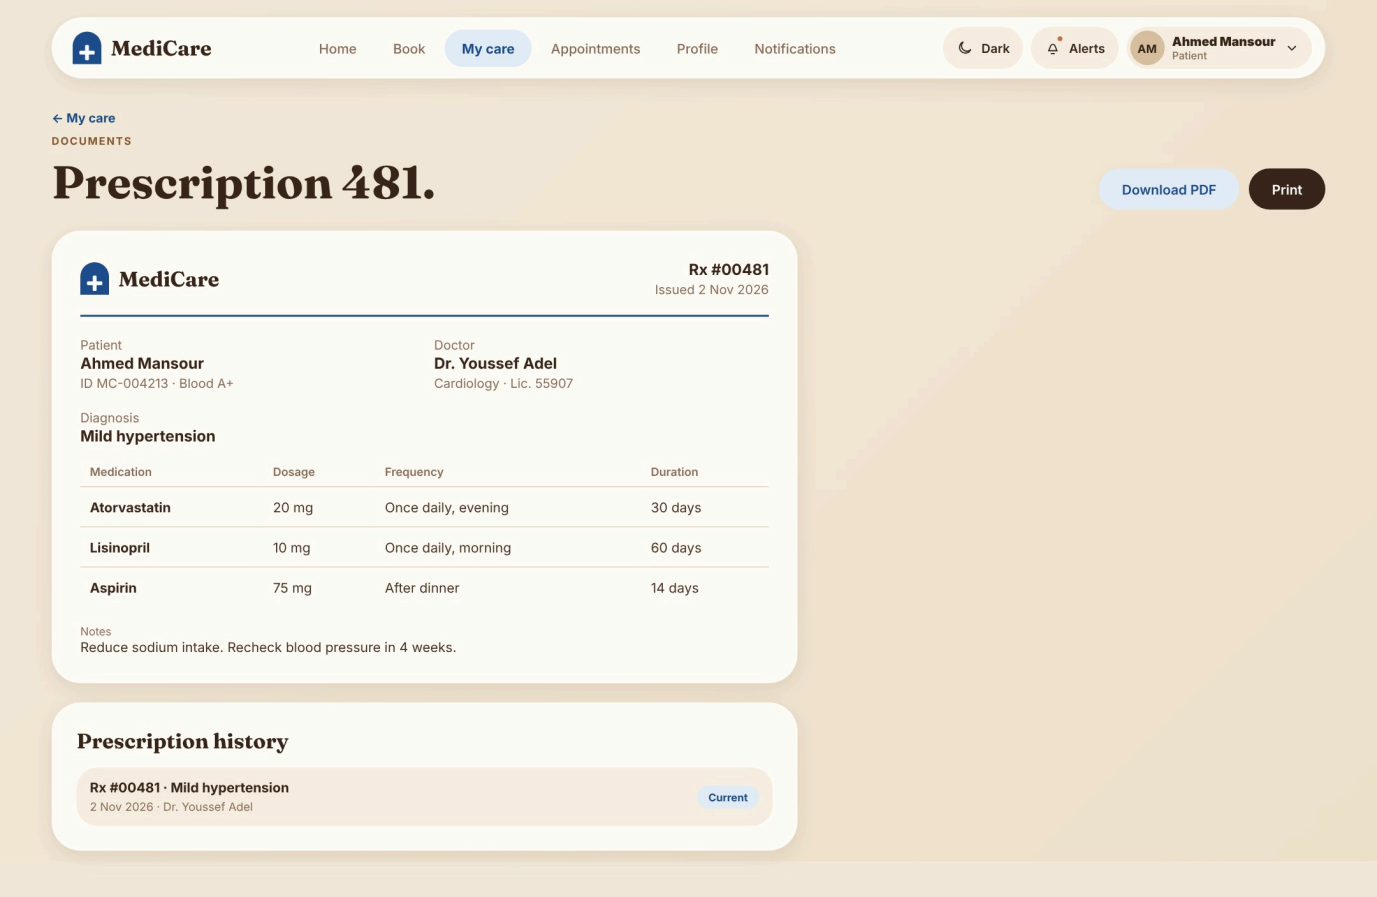

Figure 8. Patient — Prescription view and print

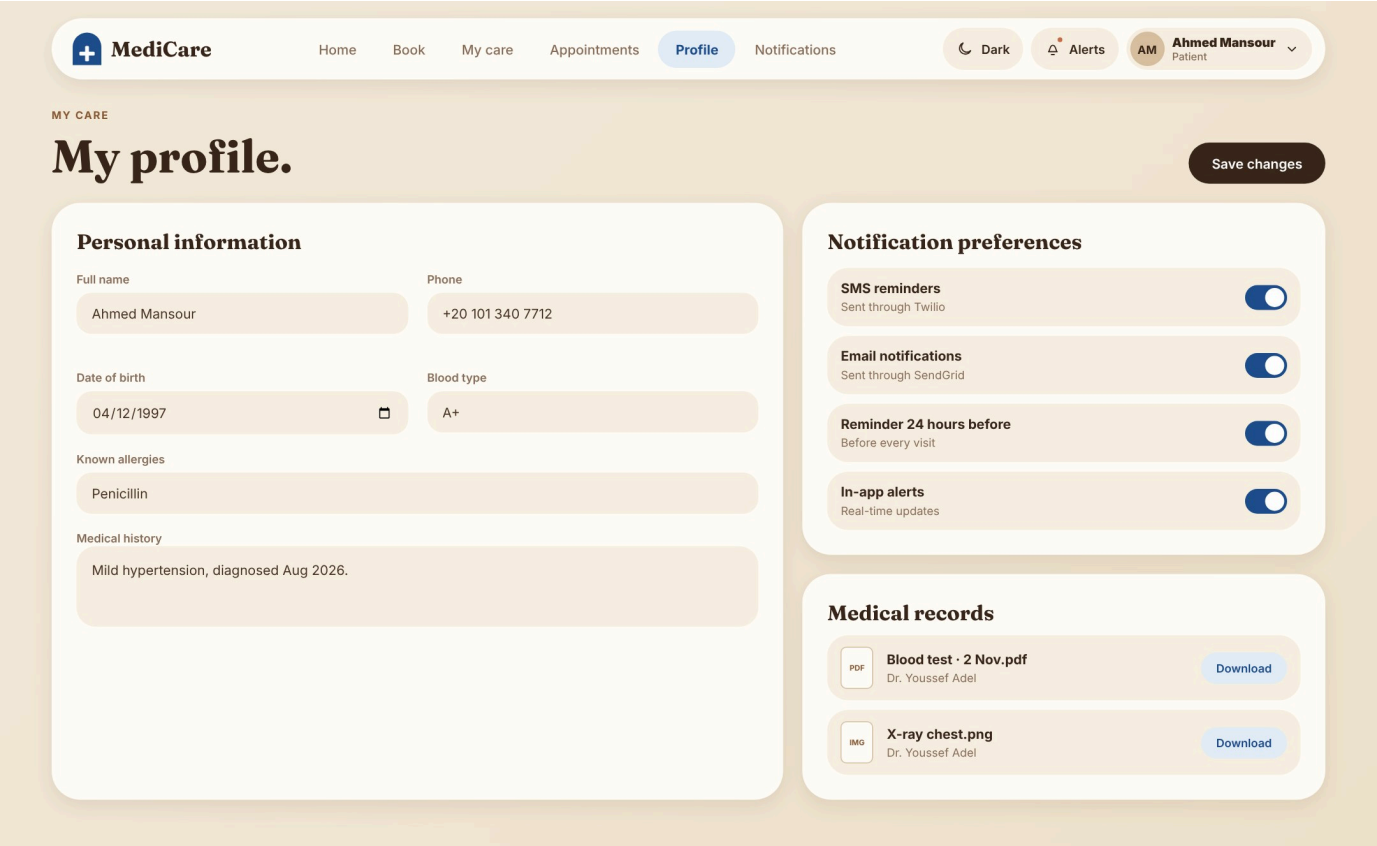

Figure 9. Patient — Profile, allergies, notification preferences

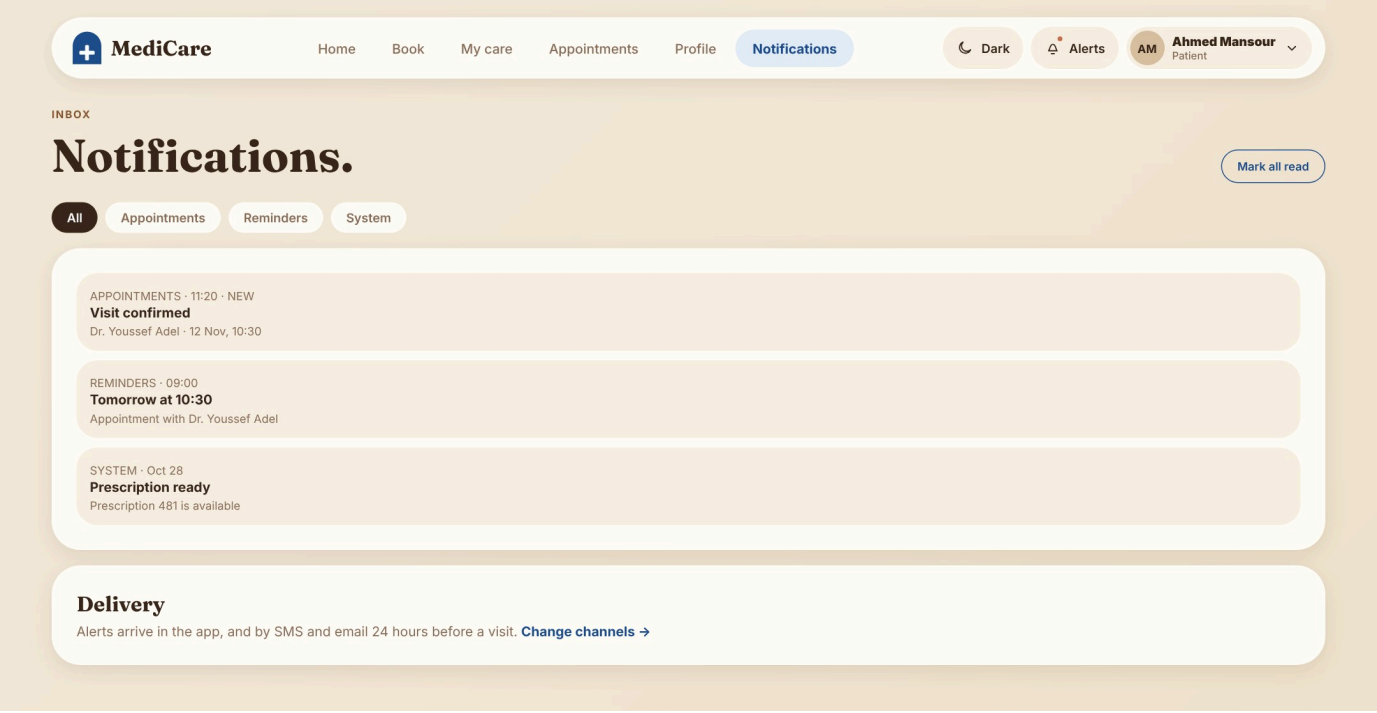

Figure 10. Patient — Notifications

Doctor

12.3 UI/UX guidelines

Item	Value in the prototype
Typography	Headings: **Fraunces** (serif, 600–700). Body/UI: **Inter** (400–700). Fallbacks: Georgia / system-ui
Light palette	Background sand `#F3EADB`→`#EFE2CB`; surface paper `#FFFDF8`; text `#4A3526`; headings/ink `#3A271B`; muted `#8A6F5B`; primary blue `#1F4E8C` (dark `#173C6D`); accent latte `#D7BFA0`, caramel `#C99A5B`, terracotta `#C96F4A`; success `#2F7A4F`; borders `#E3D5BC`
Status colors	Pending: bg `#F1E3C9` / text `#7A4F0A`; Error/rejected: bg `#F2D5C8` / text `#9A3F22`; Done: `#EADCC3`
Dark palette	Background `#0C0E12`; surface `#171A20`; text `#EFF1F6`; primary `#6F8BFF`; accent `#A6DDFA`, `#AAB5F8`, `#FDE4A4`; error `#FF8A80`; success `#34B27F`
Theme	Light/dark toggle; follows `prefers-color-scheme`, with manual override (persisted per Architecture doc: dark/light mode)
Shape / depth	Pill-shaped nav bar and buttons, rounded cards, soft shadow `0 6px 20px rgba(107,70,48,.12)`
Layout	Max width 1380px; responsive; safe-area insets for phones
Accessibility	Prototype includes `aria-*` attributes; Architecture doc commits to ARIA support; Testing plan targets **WCAG 2.1 AA**, keyboard-only navigation, screen reader, contrast checks
